Have we received just the round 3 data in electronic format yet? I am assuming they will be submitting the FPM spreadsheets electronically as well?

-Jennifer

Subject
stats for Jay

Eric and Burt - A couple of weeks ago Helle Andersen was contacted by Jay Field, who asked for results of statistical analyses of the R3B bioassay data. The attached Excel workbook contains those results. The analyses are the standard analyses incorporated into the USACE BioStat program for determining whether a test sediment is statistically different from the negative control. Would you please forward it to Jay?

We're sending this to Jay through me and you as a good housekeeping measure, so that we can readily keep track of the information exchanged. As has been the case in the past, we're willing and, to the extent that it's productive, happy to answer questions and discuss ideas, comments and suggestions about benthic modeling and bioassay interpretation with Jay. We would like to make sure that all BERA-related requests for and transmittals of data and data analyses go through me and you, though.

If Jay has questions about information we're sending, he should feel free to contact Helle.

John
